

CO-OPERATIVE ENVOSORT

Envosort is delighted to have been involved in a major mailroom project for the Manchester-based Co-operative Group, the largest consumer co-operative in the world. Annual sales of nearly £8 billion and employment of over 75,000 people testify to the Co-op's success and progressive outlook.

The selection of Envosort equipment included Series 90 durable and strong benching, storage cupboards, easily adjustable Flexibuild sort units, general purpose trolleys and seating... as well as a special unit for linking a pc to the franking machine.

With over 3,000 retail outlets embracing activities as diverse as food, travel and pharmacy, the head office high-volume mailroom in Manchester is dedicated to quality systems, as confirmed by Client Support Manager Kevin Foley "The requirement for Envosort equipment was primarily due to expansion of services within the Mail Services and Central Reprographics environments and also due to redundant equipment which had been inherited over a number of years. In accordance with our strategy for growth, we took the decision to utilise Envosort equipment as 'standard' across our mail and reprographics operations and we anticipate our relationship with Envosort will continue in-line with planned and anticipated service requirements across our many businesses. A degree of Envosort equipment was already in-situ and proved to be highly robust, which is of particular importance within the high-volume mail setting, which exists within our business. The range manages to be aesthetically pleasing whilst remaining functional and is particularly modular when it comes to decreasing or increasing specific mail networks."
