

ENVIABLE ENVOSORT

As the key source of company data for the UK and protector of consumers, creditors and shareholders, Companies House is geared to fast and accurate mail handling... and special manufacturer Envosort is proud to be associated with this crucial role.

Located in Cardiff, Companies House – a service of the DTI – contains the public records for over one and a half million registered firms, and overseas the legal requirement for the input of appropriate information and accounts.

Envosort undertook a major refurbishment of the mailroom environment, yet all was installed in a single day. The product portfolio embraces numerous customised designs combining user-friendliness and safety with visual harmony. Notable examples include special trolleys with locking lids and Nylon reinforced PVC fabric which automatically expand or deflate relative to their contents; robust and easily adjustable blue sort units at a unique low height for operators to be comfortably seated; and heavy duty Envosort Series 90 benching fitted with tasteful wood-finish laminate tops.

The overall effect is of a crucial and huge department which is both efficiently practical whilst also blending perfectly into the constant interior aesthetics. This allows Companies House to fulfil its requirements to the letter – so to speak – and be equipped for future challenges, not least the new EU Action Plan for modernising company law.
